

The SSPM & ITDR Platform to Secure Your Entire SaaS Stack

Stay on top of your apps, identities, and any unusual behavior in your SaaS ecosystem.

Stay on Top of Security Misconfigurations

Integrate with all SaaS apps to monitor and manage security misconfigurations through in-depth security checks and auto/step-by-step remediation, including GenAI configurations.

Build a Stronger Identity Security Posture

Strengthen governance of SaaS users by gaining consolidated visibility of user accounts, permissions, and privileged activities across the entire stack.

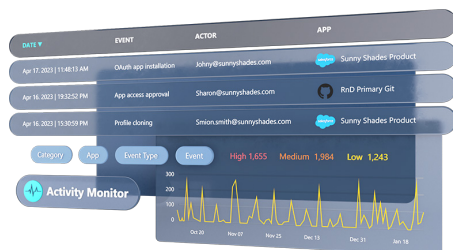

Discover 3rd Party Connected & Shadow Apps

Detect and control all sanctioned and unsanctioned 3rd party SaaS applications connected to your core SaaS hubs, including GenAI apps, and the level of risk they pose to your business.

Manage SaaS Risks Deriving from User Devices

Gain unprecedented context and visibility to easily see and manage the risks that stem from SaaS users and their associated devices.

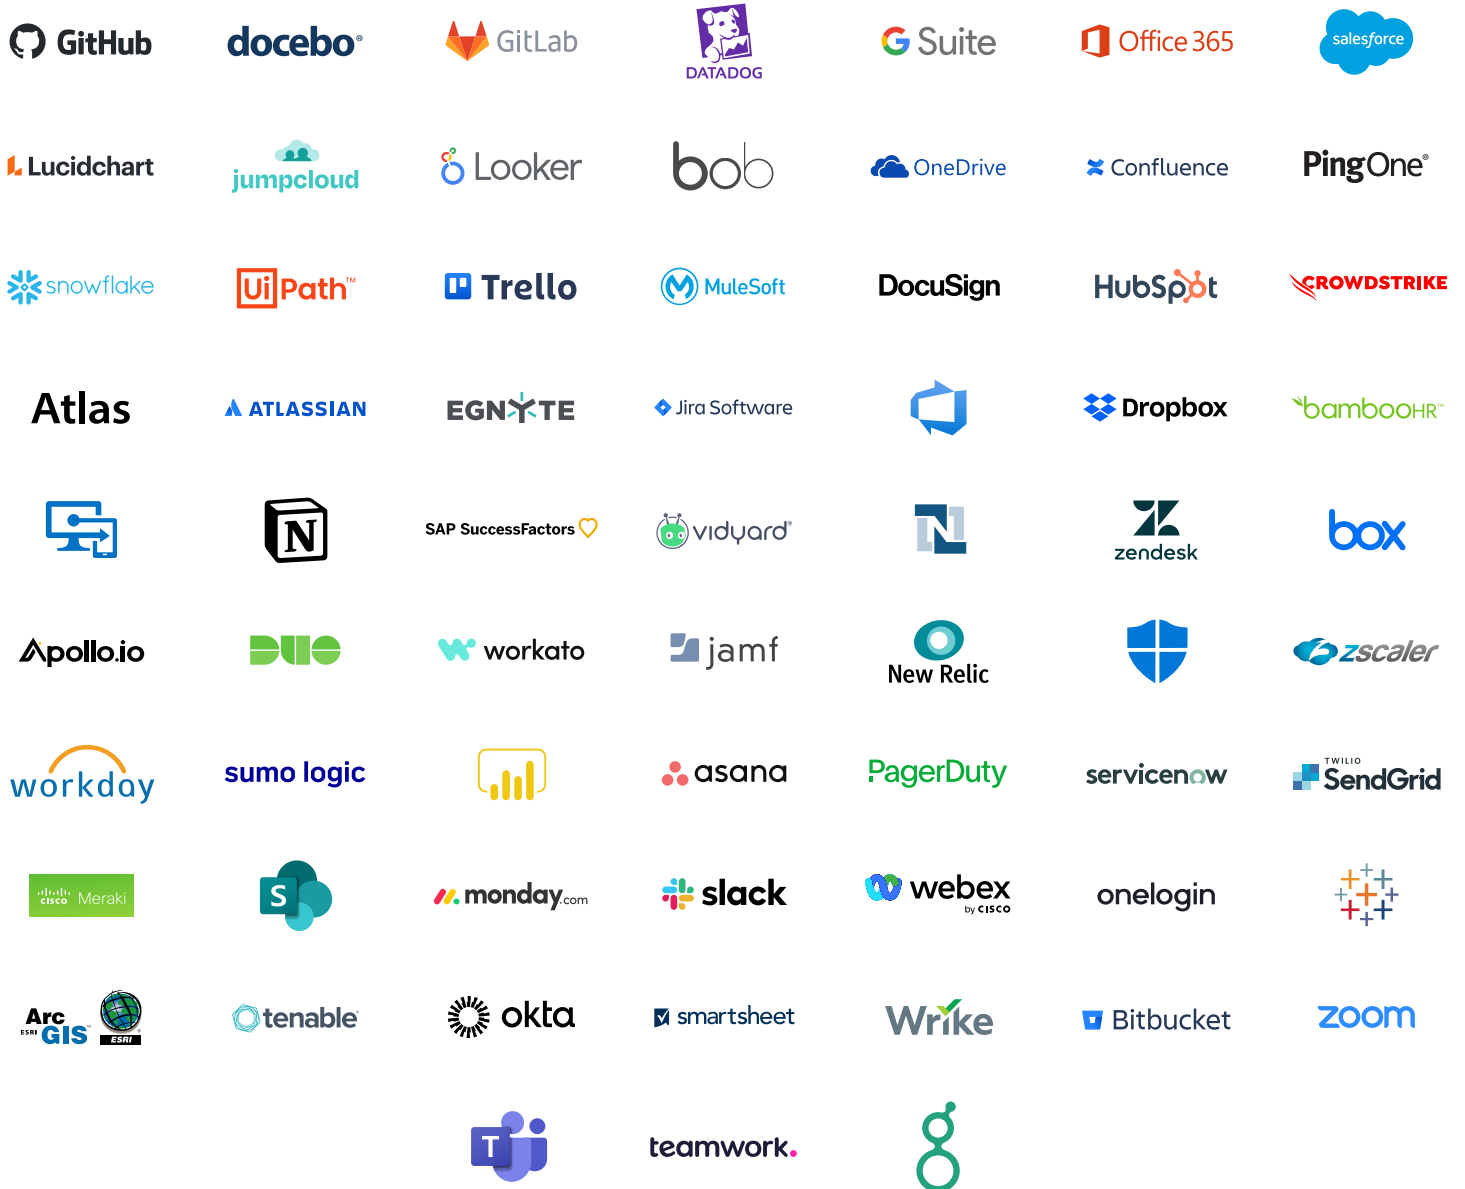

Detect and Respond to Threats (ITDR)

Detect and respond to identity-centric threats originating from the SaaS ecosystem such as unusual activities, malicious applications or any indication of compromise.

We Connect with All Your SaaS Apps

Adaptive Shield is the only solution that integrates with over 150 apps out-of-the-box and can easily integrate with any app.
